Professional Summary

I enjoy solving engineering problems at scale, whether it is building backend services, full-stack applications, or AI-powered products. I'm looking to grow as a software engineer by working on systems that impact millions of users.

Skills

- **Programming:** C, C++, Java, Python, JavaScript, TypeScript, SQL
- **Frontend:** React, Next.js, HTML, CSS
- **Backend:** Node.js, Flask, FastAPI, REST APIs
- **Databases:** PostgreSQL, MySQL
- **Cloud & DevOps:** Docker, Kubernetes, OpenShift, GitLab CI/CD, AWS (S3, Lambda, Elastic Beanstalk), Google Cloud
- **Observability:** Elasticsearch, Kibana, Logstash (ELK), Apache Kafka
- **AI/ML:** Generative AI, RAG, Deep Learning, Neural Networks, GANs

Experience

Software Engineering Intern, Barclays June 2026 – July 2026

- Built an internal **Health Monitoring & Observability System** across **5 environments**, monitoring over **250 Kubernetes resources** with **2–3 s** load times using parallel API aggregation.
- Implemented real-time monitoring for pods, deployments, CPU & memory utilization, logs, Kafka services, and application health with **500 ms to 2 s** API latency.
- Created secure OpenShift authentication with automatic token refresh, reduced deployment validation by **15–20 minutes**, **70% reduction in MTTR** with the potential to save **480 hours** annually.

AI Intern, TakeTwo

Jan 2026 – Mar 2026

- Worked on a production-grade **AI video generation platform** for the film industry.
- Delivered more than **12 core features** including an **AI music generator** and a **Canvas-style builder**.
- Reduced overall costs by **30%** and improved generation latency by **40%** through pipeline optimization.

Projects

Smart Krishi | React, TypeScript, Flask, MySQL, Hugging Face, Docker, Vercel GitHub

- Built a **one-stop AI platform for farmers** with more than **10 services**.
- Implemented crop disease prediction using **KNN models** optimized on **61K images** with **98.9% accuracy**.
- Engineered prediction systems for crop, fertilizer, yield (**97%**) and weather forecasting, enabling **multilingual access**, **voice-based navigation** and PAN-based authentication.
- Integrated a **Twilio-based AI voice call agent** enabling farmers to receive recommendations via phone calls.

AI-Based Sketch to Face Reconstruction | React, Flask, Python, CNN, GAN

GitHub

- Developed an AI system converting hand-drawn sketches into photorealistic human faces using Conditional GAN.
- Fine-tuned the model on **30K facial images**, achieving **95% reconstruction accuracy**.

Achievements

- Achieved **Knight** status on **LeetCode** (Top **5%**) with a max rating of **1869**.
- Successfully merged **40+ pull requests** as an Open Source Contributor in **GSSOC** and **Hacktoberfest**.
- Secured **AIR 71** (Starters 215) and **AIR 168** (Starters 214) among **30K** participants on **CodeChef**.
- Earned **3-Star** rating on **CodeChef** with a max rating of **1604**.
- Achieved **Specialist** rank on **Codeforces** with a max rating of **1414**.
- Winner of **CodeMania 6.0** and **Codeverse 2k26** hackathons.
- Served as **Web Development Lead** at GEDIT Coding Club, lead **6+ developers** and mentored **200+ students**.
- Selected for **Amazon ML Summer School 2026**, among the **top 3%** of **135K+** applicants.
- **Flipkart GRiD 8.0** Semifinalist, placed in the **top 2%** out of **165K** participants.

Education

Vishwakarma Institute of Technology, Pune
BE in Computer Science (Artificial Intelligence)

Aug 2023 – May 2027
CGPA: 9.4/10.0
