Professional Summary

Undergraduate Computer Science student specializing in AI with hands-on experience in building scalable web applications, contributing to open-source projects and delivering production-ready AI systems. Seeking opportunities to further expand technical expertise and broaden my industry knowledge.

Skills

- **Programming Languages:** C, C++, Java, Python, JavaScript, SQL
- **Databases:** PostgreSQL, MySQL
- **Web Development:** HTML, CSS, React, Node.js, Flask, FastAPI, REST APIs
- **AI:** Generative AI, Retrieval-Augmented Generation, Neural Networks, CGAN, Deep Learning
- **Cloud:** Amazon S3, Amazon EBS, AWS Lambda, Elastic Beanstalk, Google Cloud Engine
- **Tools:** Git, GitHub, VS Code, Claude Code, CodeRabbit
- **Core CS:** Data Structures & Algorithms, Operating Systems, Computer Networks, OOP, DBMS

Experience

AI Intern, TakeTwo (trytaketwo.app) Jan 2026 - Mar 2026

- Worked on a production-grade **AI video generation platform** for the film industry.
- Delivered more than **12 core features** including **AI music generator** and a **Canvas-style builder**.
- Reduced overall costs by **30%** and improved generation latency by **40%** through pipeline optimization.

Web Development Lead, GEDIT Coding Club May 2024 - May 2025

- Led a team of **6 developers** to design and launch a **Next.js** Web Platform serving over **500 active members**.
- Conducted **4 workshops** on Data Structures, Web Development and mentored more than **150 students**.
- Improved website UI/UX and reduced page load time by **35%** through performance optimizations.

Projects

Smart Krishi | React, TypeScript, Flask, MySQL, Hugging Face, Docker, Vercel GitHub

- Built a **one-stop AI platform for farmers** integrating more than **10 features**.
- Implemented crop disease prediction using **KNN models** optimized on **61K images** with **98.9% accuracy**.
- Engineered prediction systems for crop, fertilizer, yield (**97%**) and weather forecasting, enabling **multilingual access**, **voice-based navigation** and PAN-based authentication.
- Integrated a **Twilio-based AI voice call agent** enabling farmers to receive recommendations via phone calls.

AI-Based Sketch to Face Reconstruction | React, Flask, Python, CNN, GAN GitHub

- Developed AI system converting hand-drawn sketches into photorealistic human faces using Conditional GAN.
- Fine-tuned the model on **30K facial images**, achieving **95% reconstruction accuracy**.

Loan Ease | Java, Swing, AWT, JDBC, MySQL GitHub

- Designed a desktop-based Loan Approval System to automate loan application submission and evaluation.
- Architected a database schema managing **100K loan entries** with efficient JDBC-based transaction handling.

Achievements

- Achieved **Knight** status on **LeetCode** (Top **5%**) with a max rating of **1869**.
- Successfully merged **40+ pull requests** as an Open Source Contributor in **GSSOC** and **Hacktoberfest**.
- Secured **AIR 71** (Starters 215) and **AIR 168** (Starters 214) among **30,000** participants on **CodeChef**.
- Earned **3 Stars** rating on **CodeChef** with a max rating of **1604**.
- Achieved **Specialist** rank on **Codeforces** with a max rating of **1414**.
- Winner of **CodeMania 6.0** and **Codeverse 2k26** contests organized by MMCOE Pune.

Education

Vishwakarma Institute of Technology, Pune Aug 2023 - May 2027
BTech in Computer Science (Artificial Intelligence)

- CGPA: 9.32

Dyanganga JR College, HSC Board Jun 2021 - May 2023

- Percentage: 84
